

AUNG HTET LWIN

DEVOPS / CLOUD ENGINEER

Bangkok, Thailand | aunghtetlwin.atl@gmail.com | +66 82 838 6852 | [LinkedIn](#) | [Portfolio](#)

PROFILE

DevOps & Cloud Engineer | CNCF Kubestronaut with 4+ years of combined IT experience across software development, cloud support, and hands-on cloud-native infrastructure work. Experienced in designing and automating scalable, secure, and reliable infrastructure on AWS using Kubernetes, Terraform, and DevOps practices. Hands-on experience in Kubernetes platforms, CI/CD automation, GitOps workflows, secret management, observability, troubleshooting, and secure cloud operations. Passionate about building scalable, secure, and reliable cloud infrastructure for modern distributed systems.

EMPLOYMENT HISTORY

DevOps & Cloud Engineer, HelloCloud.io
Singapore

Dec 2023 to Present

- Designed and provisioned AWS infrastructure using Terraform, including VPC, subnets, IAM, EC2, ECS, load balancers, CloudWatch, SSM, and S3 to support repeatable cloud environments.
- Built and managed Amazon EKS environments for containerized microservices using Kubernetes Deployments, Services, Helm, HPA, ALB Ingress, and Kubernetes RBAC.
- Developed reusable Infrastructure as Code using Terraform modules, workspaces, and remote state management to improve consistency and automation of infrastructure provisioning.
- Implemented CI/CD and GitOps workflows using GitLab CI/CD, GitHub Actions, Argo CD, and Kustomize to improve deployment automation and environment consistency.
- Strengthened secure operations using HashiCorp Vault, IAM policies, AWS KMS, Kubernetes RBAC, and Istio service mesh with sidecar proxies for traffic management and service observability.
- Implemented monitoring and observability using CloudWatch, Prometheus, and Grafana to enhance system visibility and support incident response workflows.
- Automated operational tasks using Bash and Python for Linux administration, bastion host setup, secure networking support, and repeatable infrastructure operations.

Cloud Support Engineer, KBTC Group of Companies
Yangon

Feb 2022 to Nov 2022

- Provisioned and configured Microsoft Azure cloud accounts, including user setup, access management, and permission configuration.
- Administered Azure Active Directory (Azure AD) to manage identity and access control across organizational resources.
- Managed Microsoft SharePoint administration and configuration, providing technical support to users.
- Delivered Azure cloud fundamentals training and created technical documentation to support knowledge transfer and AZ-900 preparation.

Software Developer, GIC Myanmar
Yangon

Jan 2021 to Feb 2022

- Participated in software development projects as a junior developer, applying SDLC best practices to improve code quality and maintainability.
- Developed backend components using Java and PostgreSQL in collaborative environments with code reviews and version control.
- Collaborated with cross-functional team members to troubleshoot technical issues and document solutions for knowledge sharing.
- Gained exposure to modern web frameworks including Ruby on Rails and Angular through internal training and project work.

KEY PROJECTS

End-to-End GitOps CI/CD Platform on AWS EKS for a Three-Tier Web Application

- Built a three-tier Node.js, Express, and MongoDB application on AWS EKS using Docker, Terraform, VPC networking, private worker nodes, ALB Ingress, Route 53, ACM, HPA, and EBS-backed MongoDB persistence.
- Implemented CI/CD and GitOps with GitHub Actions, Docker Hub, Kustomize, and Argo CD, enabling automated dev deployments, dev auto-sync, and controlled manual production promotion.
- Added observability and reliability practices using Prometheus, Grafana, Metrics Server, Kubernetes workload dashboards, HPA metrics, health endpoints, and load testing with hey.

HCP Packer AMI Distribution & Cross-Account S3 Logging

- Automated multi-region AMI build and distribution using HCP Packer and the HCP Packer Registry, supporting production and staging image channels across Tokyo and Seoul.
- Designed a hub-and-spoke AWS setup with HCP HVN, VPC peering, S3, KMS, CloudWatch, and SSM to enable secure cross-account logging and image consumption.

EKS Cluster with Bookinfo Microservice Deployment

- Built an AWS EKS environment with Terraform, including VPC networking, managed node groups, IAM roles, security groups, and kubeconfig automation.
- Implemented Kubernetes RBAC for different user roles and deployed the Bookinfo microservices application with external LoadBalancer access and namespace-scoped permissions.

SKILLS

• AWS	• Kubernetes	• Amazon EKS	• Terraform
• Docker	• Linux	• Bash	• Python
• GitLab CI/CD	• GitHub Actions	• Argo CD	• CloudWatch
• HashiCorp Vault	• Prometheus	• Grafana	• Azure

EDUCATION

Asian Institute of Technology (AIT), Thailand Master of Computer Science	Jan 2025 to Present
University of Information Technology (UIT), Yangon B.C.Sc (High Performance Computing)	Dec 2016 to Feb 2021

CERTIFICATIONS

CNCF Kubestronaut, Linux Foundation	Feb 2026
Certified Kubernetes Administrator (CKA)	Sep 2025
Certified Kubernetes Application Developer (CKAD)	Feb 2026
Certified Kubernetes and Cloud Native Associate (KCNA)	Feb 2026
Certified Kubernetes Security Specialist (CKS)	Jan 2026
Certified Kubernetes Security Associate (KCSA)	Jan 2026
AWS Certified Solutions Architect – Associate (SAA-C03)	Dec 2024
HashiCorp Certified: Terraform Associate	Dec 2025
Microsoft Azure Fundamentals (AZ-900)	Apr 2022
Japanese Language Proficiency Test (JLPT-N3)	Jan 2022
IT Passport (IP) Exam — ITPEC, Japan	Jan 2019
Fundamental Engineering (FE) Exam — ITPEC, Japan	Jan 2019

LANGUAGES

English, Japanese (JLPT N3)
